MVP Valuation Platform

Marshall & Swift's new generation of Building Cost Valuation for Mass Appraisal

MVP Valuation Platform is Marshall & Swift's next generation Cost Approach calculation engine with data and algorithms for mass appraisal systems. MVP has the latest Web-enabled Microsoft technologies and in-demand performance features.

Improved performance

MVP provides enhanced speed and stability, especially for large batches of valuations.

Historical calculations

Calculate the historical cost of a building using the *original data*, not trending factors.

New options

Choose all or only the modules your system needs and MVP will be delivered to you on CD for installation.

Commercial/Industrial – Values in line with the Marshall Valuation Service®, Marshall & Swift's flagship manual. AVAILABLE NOW

Agricultural – Values in line with the Marshall Valuation Service. AVAILABLE NOW

Segregated – Provides deep component detail for unique structures. AVAILABLE NOW

Residential – The square foot method from the Residential Cost Handbook. Available in 2010

Mobile/Manufactured – Available in 2010

Exceptional Homes – For high-value residences up to 20,000 square feet. Available in 2010

Call now to ensure your system is up to speed with MVP, the latest Marshall & Swift platform for greater stability, faster processing and more calculating capabilities
